

MANASWI SURASKAR

manaswisuraskar10@gmail.com | LinkedIn | GitHub

Bhopal, Madhya Pradesh, India

SUMMARY

Creative and detail-oriented **Frontend Developer** with a strong focus on building modern, scalable, and user-centric web applications using **React.js and TypeScript**. Skilled in crafting intuitive interfaces, optimizing performance, and translating complex backend logic into seamless user experiences. Known for combining **AI-powered systems with elegant UI design** to solve real-world problems.

EDUCATION

Vellore Institute of Technology Bhopal B.Tech in Computer Science	Bhopal, India 2023 – 2027
S.P.M. Science and Gilani Arts & Commerce College Higher Secondary Certificate	Yavatmal, India 2021 – 2022

LEADERSHIP & EXPERIENCE

Team Lead — Notion Community VIT Bhopal

- Led initiatives to promote digital productivity tools and structured workflows.
- Designed and conducted workshops improving student engagement and tech adoption.
- Managed cross-functional collaboration and event execution.

Core Member — Notion Community VIT Bhopal

- Contributed to organizing technical sessions and community-driven events.

Volunteer — NSS Unit

- Participated in outreach programs and awareness campaigns.

HACKATHONS

CyberShield Hackathon — National Cyber Police

- Selected among **Top 35 National Finalists**.
- Designed a real-world cybersecurity solution under time-constrained conditions.

Splunk Build-A-Thon

- Developed a full-stack application with **React-based UI and AI-driven log analysis**.
- Delivered a working prototype integrating frontend and backend systems.

TECHNICAL SKILLS

Frontend: React.js, TypeScript, JavaScript (ES6+), HTML, CSS, Tailwind CSS

Backend: Node.js, Express.js

Languages: Java, Python, C++

Tools: Git, GitHub, Linux, VS Code

PROJECTS

TrueSight: AI-Powered Multi-Format Threat Detection System *React.js, TypeScript, Tailwind CSS, AI APIs*

- Engineered a **production-ready platform** capable of analyzing emails, audio, and documents for threat detection.
- Built a visually rich **React + TypeScript frontend** with glassmorphism UI, animations, and theme switching.
- Designed intelligent dashboards displaying **threat classification, confidence scores, and actionable insights**.
- Implemented resilient architecture with API fallback and local heuristic processing ensuring high availability.
- Integrated geolocation intelligence to provide contextual threat insights.
- Achieved **93.5% detection accuracy** with efficient processing under real-time constraints.

SplunkVigil: Insider Threat Detection Dashboard *React.js, Node.js*

- Developed an interactive dashboard for monitoring and analyzing system logs.
- Designed reusable UI components and dynamic data visualization.
- Integrated backend APIs for real-time threat classification.

Fake Social Media Account Detection *Python, React.js*

- Built a machine learning model to identify fake accounts.
- Developed a frontend interface for displaying predictions and insights.
