Bhopal, Madhya Pradesh, India

SUMMARY

Computer Science undergraduate at VIT Bhopal with strong interest in **cybersecurity, full-stack web development, and networking**. Skilled in **Java, Python, C++, JavaScript, and MERN stack**. Experienced in developing practical security tools and machine learning systems including insider threat detection and fake account identification. Passionate about building scalable software solutions and solving real-world technical challenges.

EDUCATION

Vellore Institute of Technology Bhopal Bachelor of Technology in Computer Science	Bhopal, India Sep 2023 – Oct 2027 (Expected)
S.P.M. Science and Gilani Arts & Commerce College Higher Secondary Certificate (Science)	Yavatmal, India June 2021 – June 2022

LEADERSHIP & EXPERIENCE

Team Lead — Notion Community VIT Bhopal	July 2025 – Present
– Lead initiatives promoting productivity tools and digital workflow solutions. – Organize workshops and collaborative sessions for students on technology and productivity. – Coordinate events and increase engagement within the student tech community.	
Core Member — Notion Community VIT Bhopal	Jan 2024 – Present
– Assisted in organizing technical workshops and community learning sessions. – Contributed to planning events and improving community participation.	
Volunteer — NSS Unit, VIT Bhopal University	Aug 2024 – Present
– Participated in community outreach and volunteer service initiatives. – Assisted in organizing awareness campaigns and development activities.	

PROJECTS

SplunkVigil: Insider Threat Detection System | GitHub

React, Node.js, Express, OpenAI API

- Developed an AI-powered web application to detect suspicious user activity from system logs.
- Implemented a risk scoring system classifying threats as **Low, Medium, or High**.
- Built responsive React interface for log input and analysis visualization.
- Integrated OpenAI API with fallback local scoring logic for threat detection.
- Designed for security monitoring demonstrations and hackathon prototypes.

Fake Social Media Account Detection

Python, Machine Learning

- Developed a machine learning system to detect fake social media accounts.
- Applied feature extraction and behavioral pattern analysis on user data.
- Implemented classification algorithms to improve fraud detection accuracy.

Network Packet Integrity Checker

C++, Computer Networking

- Built a networking tool to verify integrity of transmitted network packets.
- Implemented checksum validation to detect corrupted packets.
- Designed packet analysis module to monitor network communication reliability.

HACKATHONS

CyberShield Hackathon — National Cyber Police

- Selected among the **Top 35 National Finalists** in a cybersecurity-focused national hackathon.
- Developed and presented an innovative cybersecurity solution addressing digital threats.

Splunk Build-A-Thon Hackathon

- Developed **SplunkVigil**, an insider threat detection system for analyzing user activity logs.
- Built a working prototype using **React, Node.js, and AI-based log analysis**.
- Received recognition, rewards, and certification for the project submission.

CERTIFICATIONS

Google IT Support Professional Certificate

MERN Full Stack Developer Certification

Microsoft Certified: Security, Compliance and Identity Fundamentals

TECHNICAL SKILLS

Programming Languages: Java, Python, C++, JavaScript

Web Development: HTML, CSS, React.js, Node.js, Express.js, MERN Stack

Tools & Technologies: Git, Linux, VS Code

Areas of Interest: Cybersecurity, Web Development, Networking, Machine Learning
